Mount Abu

A pleasant retreat set amidst the lush forested hills, Mt. Abu is a green oasis in the barren desertscape that's Rajasthan. Situated at the southern tip of the Aravali range the hill retreat owes its cool climate to its rich flora covering the entire hillside that includes coniferous trees and flowering shrubs. The road leading to Mount Abu is a curved one characterized by arid region dotted with huge rocks in weird shapes and high velocity winds. The only hill station in Rajasthan, Mount Abu is more than just a summer retreat. Its stunning array of exquisite Dilwara Jain Temples, dating back 11th- 13th centuries, make it a popular pilgrimage centre. 'Abu' according to a legend stands for the son of Himalayan, deriving its name from Arbuada, the powerful serpent who rescued Nandi, the sacred bull of Lord Shiva, from a chasm.

Mount Abu has been home to many sages and saints. Most famous of them was Sage Vashishtha who is believed to have created four agnikula Rajput clans from a fire-pit by performing a 'yagna' or fire sacrifice, to protect the earth from the demons.

The Yagna was performed besides a natural spring situated below Abu, emerging from a rock shaped like a cow's head and hence the site was called Gaumukh.

Transportation-

Air : Nearest airports are Udaipur and Ahmedabad.

Rail : Nearest railhead is Abu Road (27 kms).

Road : By road Mount Abu to Ahmedabad 214 kms, Bombay 835 kms, Delhi 768 kms, Jaipur 515 kms, Udaipur 182 kms, Jodhpur 291 kms, Ranakpur 168 kms.

Bus : Regular buses connect Mount Abu with Abu Road, Achalgarh, Ahmedabad, Ranakpur, Ahmedabad, Udaipur, Abu Road. Toll Tax : Rs. 3/- for visitors to Mount Abu by Car. Vehicle Tax : Car Rs. 5/-, Bus Rs. 10/-

Taxi : Taxis and Jeeps are available from Abu Road Railway Station to Mount Abu.

What to see

Gaumukh Temple : A natural spring flowing through a sculpted cow's head gives the shrine its name. The famous 'yagna' of sage Vashishtha was performed here. A beautifully sculpted hill temple of Arbuada-the mighty serpent stands against the beautiful backdrop. Nearby is the magnificent marble image of Nandi, the celestial bull rescued by Arbuada.

Dilwara Jain Temple : These beautifully carved temples built between 11th and 13th century A.D. are sheer elegance in marble, dedicated to the Jain Tirthankaras. The Vimal Vasahi temple is the oldest of these dedicated to the first Tirthankara. Built in 1031 A.D. (by Vimal Shah-a merchant and representative of then Gujarat ruler), it is a superb example of temple architecture.

Adhar Devi Temple : The temple is chiseled out of a huge rock reached by a flight of 360 stairs. A favourite tourist spot.

Sunset Point : Spectacular sight of the setting sun when the hills are covered in the golden glow can be viewed from here.

Honeymoon Point : Also known as Andra Point, it offers an enchanting view of the verdant plains and valleys. The place looks most beautiful during the dusk hours.

Gardens and Parks : Beautifully laid parks and gardens are interspersed throughout the hilly paradise. Ashok Vatika, Gandhi park, Municipal Park, Shaitan Singh Park and Terrace Garden are some of the noteworthy gardens.

Museum and Art Gallery: Located at the Raj Bhawan, it was a collection of archaeological excavations dating back to 8th-12th century A.D. It also has Jain bronze carvings, brassworks etc. for viewing.

**PEST MANAGEMENT ASSOCIATION'S FIFTH
EDUCATIONAL PROGRAMME (2009-2010)**

**PMA's contribution to Vocational Educational and
Training Needs for the Structural Pest Control Industry
- Educational Committee**

This training programme is on Termite Management and in continuation to the past 'Two Days Course on Termite Management with MPKV' at College of Agriculture, PUNE. The topics are exclusive and all the sessions are also informative. This is the best opportunity for you to get knowledge from scientists, entomologists and experts of this industry.

Dr. P. S. Chandurkar, Plant Protection Advisor to the Govt. of India will grace the occasion as chief Guest.

**ONE REASON TO ATTEND TRAINING IS TO LEARN
TERMITE BIOLOGY AND MANAGEMENT TECHNOLOGY**

The salient features of the training programme are –

- Introduction to Termites
- Termites – Biology and Habits including Life Cycle
- Code of Practice for Anti-termite Treatment in Buildings with particular reference to construction activities.
 1. Pre-construction Measures
 2. Post-construction Measures
- Damages by Termites and how to prevent them through proper Inspection.
- Inspection Methods and Techniques.
- Termiticides - properties, dosage and equipment required
- Calculation of areas (post A.T.T.)
- Selecting proper equipment
- Termite Treatments – Application Methods and Technology
- Safety in handling termiticides and equipment.
- Quality Assurance

The training lectures will be supported by educational material, relevant codes and other useful material.

Adequate and required audio-visual equipment will enhance the contents of the course material.

Certificate for attending the course shall be awarded.

Speakers: Dr. N. S. Rathore
